

# Atlas Copco

## Oil-free Water-injected Screw Compressors

### AQ 30-55 / AQ 37-55 VSD

Air-cooled & water-cooled (30-55 kW/40-75 hp)

## Total capability, total responsibility

Right at the heart of your business, Atlas Copco delivers quality compressed air for superior operational capacity. From compressed air generation to point of use, you can choose from our wide range of products to create a complete compressed air system tailored to your specific needs. All Atlas Copco products are engineered to integrate seamlessly, ensuring the highest level of reliability and energy efficiency. As a result, Atlas Copco can take full responsibility for your compressed air infrastructure with a guarantee of best-in-class quality. With a global presence in over 150 countries, we can provide an unrivalled service to maintain and continually improve your compressed air system performance.

Backed by 100 years at the forefront of compressed air, Atlas Copco products offer the finest quality and efficiency. Our goal is to be First in Mind—First in Choice™. That is why Atlas Copco's pursuit of innovation never ceases, driven by the dedication to meet and exceed your demands. Always working with you, we are committed to providing the customized air solution that is the driving force behind your business.

***We are committed to your superior productivity through interaction and innovation.***

# Powerful oil-free air

When it comes to clean, oil-free compressed air, you cannot afford to compromise on quality. Atlas Copco has pioneered the development of oil-free air screw technology, resulting in a full range of compressors delivering 100% oil-free, clean air. Setting the standard for air purity through ISO 8573-1 CLASS 0 certification, the AQ water-injected screw compressors, available in water-cooled and air-cooled versions, meet your precise needs for pure oil-free air while offering high-pressure capability and improved energy efficiency.

## WHY OPT FOR AQ?

Whether your activities are in pharmaceutical production, food processing, critical electronics or in a similarly exacting industry, air quality is paramount for your end product and production process. Developed especially for applications demanding the highest levels of purity, Atlas Copco's AQ oil-free compressors

eliminate the risks of oil contamination as well as the resulting extra costs. By preventing oil from entering the compression process, the generation of consistent 100% oil-free air is ensured while you benefit from lower operating and maintenance costs with a CLASS 0 certified compressor.

## HOW TO REDUCE ENERGY COSTS WITH AQ?

With energy amounting to over 70% of a compressor's lifecycle costs (LCC), its importance is clear. The most cost-effective compressed air solution optimizes the pressure, volume and air treatment equipment for each production process. Atlas Copco's

AQ compressors provide you with the ultimate all-in-one package to reduce your electricity bill by up to 40%. Thanks to the superior cooling capability of water which ensures that the heat is removed efficiently at the source, more air per kW of power is generated.

## WHO IS BEHIND AQ?

Drawing on vast experience and continuous technological innovations, Atlas Copco has been leading the industry in oil-free compressed air technology for over sixty years. As the first manufacturer to receive ISO 8573-1 CLASS 0 (2001)

certification for its oil-free screw compressors, we set a new standard in air purity. With the protection of your application in mind, Atlas Copco has designed its AQ range to offer the superb 100% oil-free quality air you are in need of.

# Engineered to meet your needs

At Atlas Copco we aim to provide you with compressors that fulfill and even exceed your expectations and demands. Built as the result of decades of experience in oil-less design and manufacturing, the AQ oil-free range of water-injected screw compressors gives you all of this experience and knowledge in a class leading package.

**AQ 55 VSD**  
air-cooled

**AQ 55 VSD**  
water-cooled

## HIGH EFFICIENCY

1

### AIR FILTER

SAE fine 99.5%  
SAE coarse 99.9%

2

### WATER FILTER

Filtering the water in the lubrication circuit, the water filter ensures a constant supply of clean lubricant. The filtration capability equals 10 micron throughout the filter's lifetime.

3

### SEPARATOR VESSEL

Stainless steel water separator vessel for separation via centrifugal and gravity forces. Two sensors (a low sensor and a high sensor) are included to maintain correct water levels.

4

### INDUCTION MOTOR

IP55 induction motor, flange-mounted for perfect alignment. Combined with direct driven arrangement for superior energy efficiency.

5

### AIR-COOLED FAN AND WATER-COOLER

The AQ is available as air-cooled or water-cooled unit. Compared to external cooling systems, both the footprint and installation costs of air-cooled units are extremely low thanks to the air-air and air-water stainless steel heat exchangers. Incorporating a new, over-sized water-water exchanger, water-cooled units provide a virtually continuous water temperature at the dryer inlet of less than 55°C (131°F) without after cooler.

## TOTAL SUPERVISION AND MONITORING

6

### ELEKTRONIKON®

Advanced Elektronikon control and monitoring system, designed for integration in a (remote) process control system.

## QUIET OPERATION

7

### SOUND INSULATED CANOPY

No separate compressor room is required as the sound insulated canopy allows for installation in most working environments.

## MINIMUM INSTALLATION COSTS & FLOOR SPACE REQUIREMENTS

8

### INTEGRATED REFRIGERANT DRYER

The Full Feature versions include an integrated refrigerant dryer as standard.

## CLEAN, PURE & RELIABLE OPERATION

9

### WATER PUMP

Adding to the durability of the bearing, the water pump increases the bearing pressure level at start up and during off load. This minimizes energy consumption, eliminates stress on the bearings and balances pressure between the bearings and the rotor housing.

10

### REVERSE OSMOSIS SYSTEM

Using distilled water or reverse osmosis water for the water injection, the built-in reverse osmosis system ensures a constant supply of high quality water, avoiding corrosion and bacteria growth.

11

### ELEMENT BEARINGS

No oil is used within the compressor element. Even the element bearings are water-lubricated, providing 100% oil-free air. The bearings are grease-free, eliminating any risk of contamination. As the bearings slide on the water, their lifetime is extended and a smooth rotation of the element is ensured.

# Proven technology

At the heart of the new AQ range is a unique water-injected screw element producing highly efficient near isothermal compression. The polymer ceramic rotors with their optimized rotor profile are supported by water-lubricated bearings, ensuring that no oil contaminates the compression element, thereby producing pure oil-free air.

## ROTORS

A highly efficient compression process is achieved thanks to high quality polymer mould ceramic rotors with optimum profiling. The combination of corrosion-free, high efficiency raw material and water lubrication results in a longer lifespan.

## ELEMENT HOUSING

Strength and durability are ensured as a result of the aluminium bronze element housing without risk of corrosion within the element.

## ELEMENT BEARINGS

The use of hydrodynamic bearings ensure long life as no physical contact is made within the bearing itself, it simply glides on a film of water removing the need for any oil or grease lubrication.

## WATER-INJECTED SCREW COMPRESSION EFFICIENCY

The superior cooling capability of water ensures that the heat is removed efficiently at the source. Removing the wasted energy that heat represents gives more air per kW of power. The low temperature of the compressed air reduces the stress on components ensuring long life.

## SUPERIOR WATER-INJECTED SCREW ELEMENT

49.6°C, 121.3°F

- INCREASED FREE AIR DELIVERY.
- LOW SPECIFIC ENERGY CONSUMPTION.
- NEAR ISOTHERMAL COMPRESSION PROCESS.
- PRESSURE RATINGS OF 7, 10 AND 13 BAR ENSURING SUITABILITY FOR A WIDE VARIETY OF APPLICATIONS.

*The highly effective cooling capabilities of water combined with precision engineering ensure the supreme energy efficiency of the AQ compressors.*

# Exceptional versatility

Contrary to traditional compressor set-ups, Atlas Copco's AQ WorkPlace Air System, compressors effortlessly fit onto your work floor. With their compact footprint and integration of air treatment equipment, AQ compressors ensure optimum efficiency and reliability. Designed to give the most versatile source of compressed air, they provide you with an all-in-one package that will have your production running smoothly for years to come.

## TRADITIONAL COMPRESSOR SET-UP

- 1 HIGH PRESSURE DROP ACROSS THE SYSTEM
- 2 EXTERNAL FILTRATION EQUIPMENT/DRYER
- 3 ELABORATE AND COSTLY PIPING SYSTEM
- 4 MULTIPLE CONNECTIONS AND AIR LEAKS
- 5 MULTIPLE MONITORING POINTS

### HIGH NOISE OPERATION

- SEPARATE COMPRESSOR ROOM
- RAISED INSTALLATION & ENERGY AS A RESULT OF HIGH PRESSURE DROP

### COSTS

## WORKPLACE AIR SYSTEM™

- 1 LIMITED INTERNAL SYSTEM PRESSURE DROP
- 2 INTEGRATED AIR AND CONDENSATE TREATMENT EQUIPMENT
- 3 REDUCED PIPING COSTS
- 4 SINGLE POINT CONNECTIONS
- 5 SINGLE POINT MONITORING

# ISO 8573-1 CLASS 0

## Atlas Copco sets a new industry standard

When it comes to clean, oil-free compressed air for your critical processes, you can't afford to compromise. Atlas Copco, a pioneer in oil-free air screw technology, is known for its range of water-injected compressors designed especially for applications that require oil-free air. Now Atlas Copco has achieved a new milestone: setting the standard for air purity as the first manufacturer to be certified ISO 8573-1 CLASS 0.

*The only air compressors TÜV-certified as "oil-free" (ISO 8573-1 CLASS 0)*

### WHY A NEW CLASS?

Industries such as pharmaceuticals, food and beverages, electronics and textiles must eliminate any risk of contamination. Otherwise severe consequences could follow: spoiled or unsafe products, production downtime and damage to both brand and reputation. To address the needs of critical applications where air purity is essential, the ISO 8573-1 compressed air standard was revised in 2001. Along with a more comprehensive measuring methodology, a new and more stringent class was added to the five existing purity classes: ISO 8573-1 CLASS 0.

CLASS	Concentration total oil (aerosol, liquid, vapor) mg/m <sup>3</sup>
<b>0</b>	<b>As specified by the equipment user or supplier and more stringent than class 1</b>
1	< 0.01
2	< 0.1
3	< 1
4	< 5

### FIRST TO ACHIEVE ISO 8573-1 CLASS 0

As the industry leader committed to meeting the needs of the most demanding customers, Atlas Copco requested the renowned TÜV Institute to type-test its AQ range of oil-free water-injected screw compressors. Using the most rigorous testing methodologies available, all possible oil forms were measured across a range of temperatures and pressures. The TÜV found no traces of oil at all in the output air stream. Thus Atlas Copco not only became the first compressor manufacturer to receive CLASS 0 certification, but also exceeded ISO 8573-1 CLASS 0 specifications.

### ATLAS COPCO ELIMINATES ANY RISK

Only oil-free compressors deliver oil-free air. Whether your activities are in pharmaceutical production, food processing, critical electronics or a similarly exacting industry, it is essential to eliminate risk. That's why you need an Atlas Copco risk-free solution: oil-free screw compressors especially for applications demanding the highest levels of purity. Zero oil means zero risk. Zero risk of contamination. Zero risk of damaged or unsafe products. Zero risk of losses from operational downtime. Above all, zero oil means zero risk of ruining your hard-won reputation.

## THE MOST STRINGENT AIR PURITY TESTING AVAILABLE

Most manufacturers prefer “partial flow” testing, which targets only the center of the air flow. The Atlas Copco AQ range of oil-free water-injected screw compressors was tested using the more stringent

- 1 Aerosols**  
Minute droplets of oil suspended in the air stream
- 2 Wall flow**  
Oil in liquid form, which creeps along the pipe wall
- 3 Vapors or oil mist**  
Vaporized oil in a cloud form

“full flow” method. This examines the entire air flow to measure aerosols, vapors and wall flow. Even with such rigorous testing, no traces of oil were found in the output air stream.

### CAN OIL-INJECTED COMPRESSORS WITH OIL REMOVAL FILTERS DELIVER OIL-FREE AIR?

Often referred to as “technically oil-free air”, this system relies on air cooling devices and several stages of oil removal with multiple components. A failure of any of these components or inadequate maintenance can result in oil contamination of a process. Therefore, with oil-injected compressors there will always be a risk of contamination and the possibility of severe consequences for your business.

*TÜV (Technische Überwachungsverein/Technical Monitoring Association) reporting on the Atlas Copco AQ range of oil-free water-injected screw compressors.*

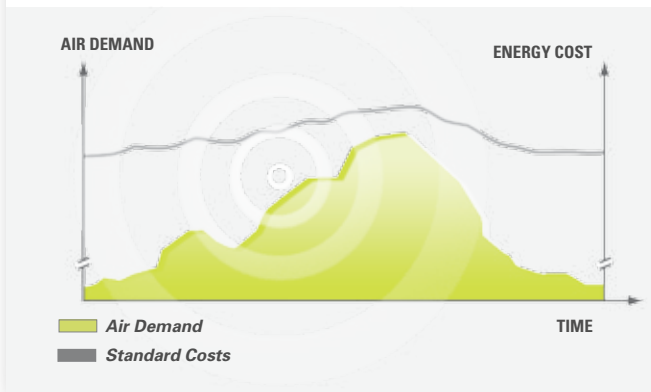

Move up to a risk-free standard.

# Limiting energy costs

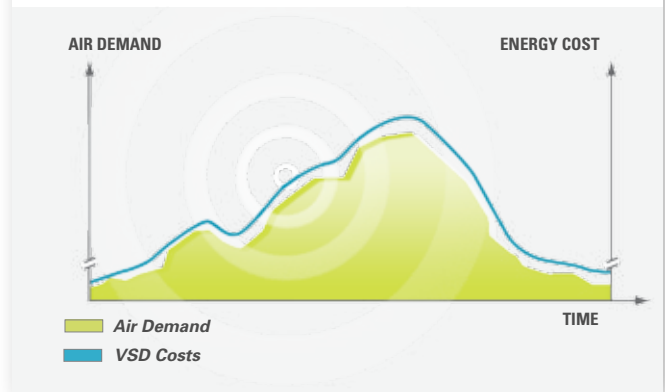

As energy can represent over 70% of a compressor's lifecycle costs (LCC), optimizing energy consumption is essential. In fact, considering that the generation of compressed air can account for more than 40% of a plant's total electricity bill, it is even crucial. With Atlas Copco's VSD (Variable Speed Drive) technology, we provide you with a partner on the road to unrivalled cost savings. By mirroring compressed air demand, the AQ make major energy savings a reality.

## THE HIGH PRICE OF FLUCTUATING DEMAND

Traditional compressors working with a 'full load, no load' control operate between two set pressure points. When maximum pressure is reached, the compressor goes off load. During periods of medium to low air demand, the no load power consumption can be excessive – wasting large amounts of energy.

## VSD: VARIABLE VOLUME, CONTROLLED COSTS

Because there is no unnecessary power generated, the AQ VSD can reduce energy costs by up to

## LCC OF A STANDARD COMPRESSOR

## LCC OF A VSD COMPRESSOR

The long-term cost of owning and operating a compressor is a combination of capital, installation, servicing and energy costs. Opt for an AQ VSD compressor solution to obtain the highest return on investment.

# VSD: maximizing efficiency, saving energy

In your competitive production environment, being able to reduce costs is one of your main concerns. With VSD technology you obtain energy savings that will greatly downsize your electricity bill. By automatically tuning compressor capacity to the precise air demand, only a minimum amount of energy is required. The resulting energy savings benefit you as well as the environment, safeguarding a healthy future for the generations to come.

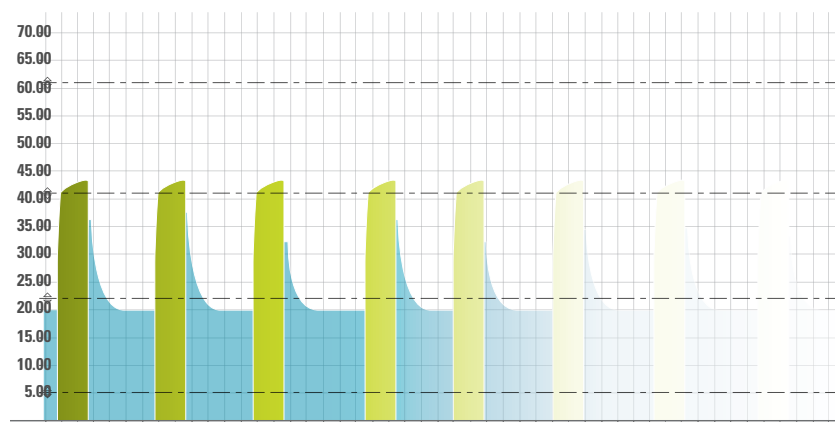

## THE AQ VSD REDUCES ENERGY COSTS BY:

- Eliminating the inefficient transition period from full to no load power.
- Avoiding excessive off load power consumption.
- Maintaining the net pressure band.
- Reducing overall average working pressure.
- Minimizing system leakage due to a lower system pressure.
- Increasing flexibility with soft starting gradual motor ramp-up to avoid electricity surges.
- Offering flexible pressure selection from 4 to 13 bar with electronic gearing to ensure lowered electricity costs.

AMPS

### STATUS OF GENERAL LOAD - NO LOAD COMPRESSOR

TIME

*The AQ VSD efficiently handles the varying air demand found in most plant systems.*

# Superior control and monitoring

You rely on your compressed air solution to perform efficiently day in, day out. To guarantee maximum uptime, continuous surveillance is a must. By properly monitoring your compressed air system you cannot only decrease downtime but also save energy, reduce maintenance and increase production throughput. With Atlas Copco's range of state-of-the-art control systems, those benefits are at your fingertips.

## ADVANCED POSSIBILITIES

The Elektronikon operating system provides control and monitoring to increase your compressor's efficiency and reliability. Easily expandable with extra sensors, digital inputs and internet

communication functions, the Elektronikon can be adapted to your specific needs and offer simple, central control of up to four compressors.

## SUPREME ENERGY SAVINGS

- Precise pressure control for optimal efficiency.
- Shutdown scheduling to avoid costs during non-working hours.
- Prioritized use of the most economic machines over older, less effective versions.
- Continuous usage of VSD machines.
- Use of multiple VSD compressors in their most efficient performance zones.

## THE ULTIMATE IN REMOTE MONITORING

With AIRConnect™, Atlas Copco offers you a sophisticated modular package for advanced remote monitoring, complete analysis and accurate management. Fully customizable to meet your

specific needs, this solution – made up of four different levels of functionality – stands for exceptional convenience and absolute peace of mind within your production environment.

For additional information on Atlas Copco's monitoring packages, please consult the specific solution literature.

# Peace of mind

With the AQ, Atlas Copco does not just offer the most reliable and efficient compressors. From filter kits to a complete piping installation, Atlas Copco can take responsibility of your entire compressed air system to provide you with best-in-class air.

Choose from a wide range of Atlas Copco aftermarket products and services that will have your AQ performing at its best for years to come. Qualified Atlas Copco support is available in over 150 countries.

*Our Aftermarket product portfolio is designed to add maximum value for our customers by ensuring the optimum availability and reliability of their compressed air equipment with the lowest possible operating costs.*

## GENUINE PARTS

Don't compromise your investment in quality by buying parts that are not manufactured according to Atlas Copco's standards of excellence. Only Atlas Copco genuine parts can deliver our well-known quality, durability and low energy.

## AIRCONNECT

Monitor the performance of your AQ at any time from your desk, or let your local Atlas Copco center do it for you. With AIR-Connect™, you check your compressed air system online, immediately receiving warning indications and even remotely taking preventive action to avoid downtime.

## SERVICEPLAN

Choose a Total Responsibility, Preventative Maintenance or Inspection Plan to get the scheduled maintenance to keep your compressor operating trouble free. Rest assured that Atlas Copco can offer its 24/7 backup to keep your production running.

## AIRNET

Expect the highest efficiency from your AQ, and the piping built around it. AIRnet™ safely delivers high-quality compressed air from point of generation to point of use. Separate workplaces are effortlessly connected. Fixed to walls or ceilings, AIRnet's range of fittings lets you custom-build a compressed air system specific to your production needs.

# Optimize your system

The AQ can be tailored to your needs. From an integrated dryer and filter to rain protection, all optional parts are available to further optimize the AQ's performance, or to simply tailor it to your specific production environment.

What sets Atlas Copco apart? Our belief that, to excel, we must provide the best possible know-how and technology in ways that our customers value. Whether we're fully supporting existing products or advancing technology through innovation, we constantly focus on customer needs.

The Atlas Copco way of doing business grows from ongoing interaction, long-term relationships, and a commitment to understanding each customer's process and objectives. As a result, every compressed air solution we create helps a customer operate with greater efficiency, economy, and productivity.

Satisfying customer needs effectively has made Atlas Copco the number one compressor manufacturer in the world. We will continue to attract new business through our unwavering conviction to creating products and ideas that help our customers succeed.

Danger: Compressed air should never be supplied as breathing air unless air is properly purified for breathing. Atlas Copco assumes no responsibility or liability related to the purchaser's/user's breathing air system.
